Apple Media Services: Apple Music Container Details

January 2022

File name

Apple Music Container Details.csv

File description

This file contains information about Apple Music containers. A container is a playlist, radio station, album, or other grouping of individual tracks.

Why Apple keeps this information

Apple retains this information in order to support various features within Apple Music and for other Apple applications where music is used.

Field Name	Details
Artists	The artists associated with content in the container
Artist Name	The artist chosen as the source for the container, if the container is a radio station
Container Type	The type of container played (e.g., playlist, album, radio station, etc.)
Date Created	The date and time on which the container was created
Genres	The genres associated with the content in the container
Origin	The source for the container (e.g., user playlist, editorial playlist, etc.)
Last Played	The date and time on which the container was last played
Play Count	Number of times the container has been played
Play Duration Milliseconds	Play duration of the container, in milliseconds
